Detail-oriented **MERN Stack Web Developer** with a strong analytical mindset and a knack for organized coding. Proficient in all aspects of web development, from front-end to back-end, and adept at following best practices. A team player who values collaboration and takes ownership of projects, consistently delivering top-tier solutions to overcome obstacles and drive website success.

Education

Dawn Public School 2010 – onwards

PROJECTS

EXPENSE TRACKER -REACT

- I designed and developed a personal expense tracking tool to efficiently manage and monitor my financial expenditures.
- Implemented features for adding, editing, and deleting expense entries, providing real-time control over my expense records.
- Customized filtering options, allowing me to gain valuable insights into my spending patterns and make informed financial decisions.
- Effectively managed personal finances and budgeting with the aid of this self-created expense tracker.

FOOD DELIVERY WEBSITE -MERN

- Designed and developed a full-fledged food delivery application from scratch
- Implemented essential features such as user authentication, order placement for enhanced customer satisfaction.
- Customized filtering and search functionalities, enabling users to easily discover food items.
- Implemented "My Orders" functionality for users, to keep track of their orders.
- Implemented "Add Product" functionality for vendors, providing a versatile platform for adding menu items.
